swainsatya07@gmail.com

SUMMARY

Results-oriented Software Engineer with over 1.5 years of experience. Skilled in Python, Django, React.js, Django REST Framework, and MySQL. Strong problem-solving abilities and attention to detail, with a passion for learning and growth in dynamic environments.

EXPERIENCE

AmberTAG Analytics Pvt Ltd,Bengaluru - *SoftwareEngineer*

Apr 2023 - PRESENT

- Developed and maintained web applications.
- Utilized Python, Django, React.js, and MySQL.
- Showcased strong debugging skills and effective teamwork.

PROJECTS

H R M — Developed a **Human Resource Management** (HRM) system, focusing on streamlining and automating HR processes.
Built with React and Python, the platform facilitates efficient management of employee data, recruitment, performance tracking, and payroll processing.
The HRM system is designed to enhance productivity and ensure compliance, offering an intuitive interface that makes it easy for HR professionals to manage their tasks effectively.

H P M – Developed **Health Pro Match** (HPM), a React and Python-based platform aimed at connecting and expanding their professional networks.

HPM enables users to quickly find project resources, mentors, jobs, and like-minded professionals while offering a customizable and collaborative experience.

With a focus on fostering connections and improving peer-led networks, HPM is designed to be both creative and user-friendly, accessible directly from a smartphone.

Churn Analytics And LeadScoring-

Developed the **Churn Analytics and Lead Scoring** platform with a modern, responsive UI using React and Material UI.

Implemented authentication for a seamless, secure user experience. Collaborated with cross-functional teams to align functionalities with project goals.

EDUCATION
